# NATIONAL RESIDENT MATCHING PROGRAM

## INTRODUCTION

The NRMP was established in 1952 to provide both applicants and residency program directors a fair opportunity to consider their options for appointment, to make reasoned decisions, and to have their decisions announced at a uniform time.

The first match was conducted in 1952 when 10,400 internship positions were available for 6,000 U.S. graduating seniors. By 1973, there were 19,000 positions in the match for just over 10,000 U.S. graduating seniors. Following the demise of internships in 1975, the number of first year post-graduate (PGY-1) positions in the match dropped to 15,700. The number of PGY-1 positions offered gradually increased through the 1994 Match, and then began to decline slowly until 1998. This year, a record high 21,192 positions were offered (Figure 1).

The increase in the total number of applicants since 1952 is more dramatic, starting with 6,000 in 1952 and rising to a high of 36,056 in 1999. After a decline of 5,052 applicants from 1999-2003, the number registered for the 2004 Match increased to 31,140, 136 more than the prior year.

NRMP completed a total re-engineering of the matching process for the 2002 Match. The web-based Registration, Ranking, and Results system (R3) was launched in July 2001. It is completely paperless and allows applicants and programs to complete all match-related activities on-line including:

- registration, with applicants paying their registration fees on-line by credit card or electronic checking;
- rank order list entry; and
- obtaining Match results.

The new system is a user-based system rather than a program-based system, with all participants being assigned a unique ID number, which they will use again in matches in subsequent years. The system also relies almost exclusively on e-mail communications, which allows the NRMP to send messages to participants on short notice.

Beginning in 2002, the NRMP augmented the release of Match results on the web during Match Week with e-mail messages to applicants, program directors, and schools at critical times. In addition, the Registration, Ranking, and Results System (R3) is supported by an expanded pool of servers. Those two changes improved the performance of the application during peak times near the rank order list deadline and during Match Week.

The NRMP is managed by the Association of American Medical Colleges (AAMC). Operations are conducted in the AAMC's Division of Medical School Services and Studies.

Special data requests pertaining to this or prior matches should be directed in writing to:

## TABLES 1 and 2

The 2004 Match was highly successful, with higher program fill rates in most specialties and overall match rates for applicants nearly identical to last year. Tables 1 and 2 illustrate the trends in the numbers of positions and applicants participating in the Match during the past seven years. Many applicants, in addition to U.S. senior medical students, seek residency positions through the NRMP. The data for different categories of applicants are shown in Table 2. U.S. foreign graduates are defined as U.S. citizens who are graduates of foreign medical schools, and non-U.S. foreign graduates are non-U.S. citizen graduates of foreign medical schools.

The total number of positions offered in the 2004 Match was 23,704, an all-time high. The number of PGY-1 positions increased by 284 (1.3 percent), and the number of PGY-2 positions grew by 55 (2.2 percent). The increase can be attributed primarily to 68 (6.7 percent) additional preliminary surgery positions, 59 (1.2 percent) more categorical and 48 (2.6 percent) more preliminary internal medicine positions, 34 (3.4 percent) more psychiatry positions, and 32 (3.0 percent) additional transitional year positions.

The total number of registrants grew in 2004, with 136 more this year than last. The number of non-U.S. citizen foreign graduates increased for the second year in a row, by 185 to a total of 8,796 (Figure 2). The earlier decreases followed shortly after July 1, 1998, when the Educational Commission for Foreign Medical Graduates (ECFMG) required successful completion of the Clinical Skills Assessment (CSA) examination for certification.

Further examination of U.S. citizen and non-U.S. citizen foreign medical graduates who registered for the match but did not actively participate shows that 1,220 were withdrawn because they lacked eligibility for certification by the ECFMG. That number is 493 fewer than were withdrawn in 2003 for the same reason.

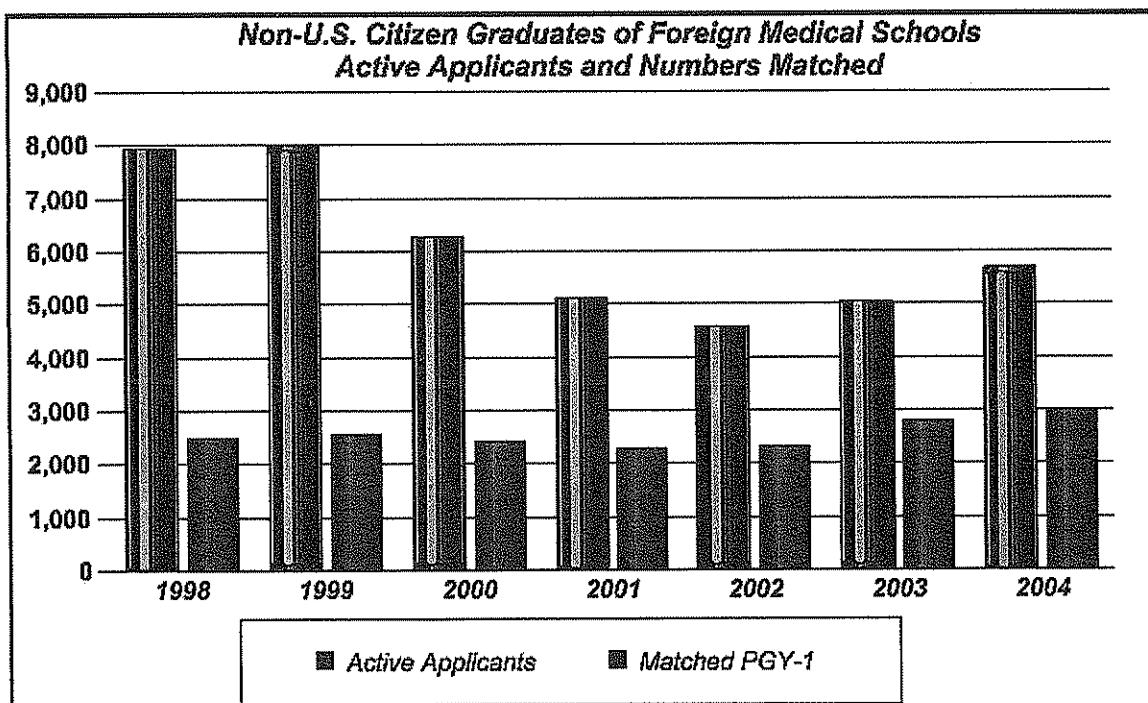

The number of U.S. seniors increased for the first time since 1998. There were 136 more U.S. seniors than in 2003, an increase of 0.9 percent. The number of U.S. seniors active in the Match increased to 14,609, 277 more than in 2003. An active applicant is defined as one who submits a rank order list of residency program choices. As in years past, U.S. seniors had the highest match rate. This year, 92.9 percent (13,572) of the U.S. seniors who submitted rank order lists were matched to first-year positions. Adding the 166 seniors who matched to a PGY-2 position but not a PGY-1 position, 94.0 percent of U.S. seniors matched to at least one position.

Although the total number of registrants rose by 136 from 2003 to 2004, the number of active applicants grew by 1,281 (5.3 percent) to 25,246. Of those, 19,391 were matched to PGY-1 residency positions, 585 more than last year. Because the increase in active applicants was accompanied by a smaller increase in positions offered, the match rate for all applicants declined slightly to 76.8 percent (Figure 3).

Note: Active Applicants are those who submit a list of residency program choices.

Note: Unmatched PGY-1 applicants includes applicants who matched to PGY-2 positions, but not to PGY-1 Positions.

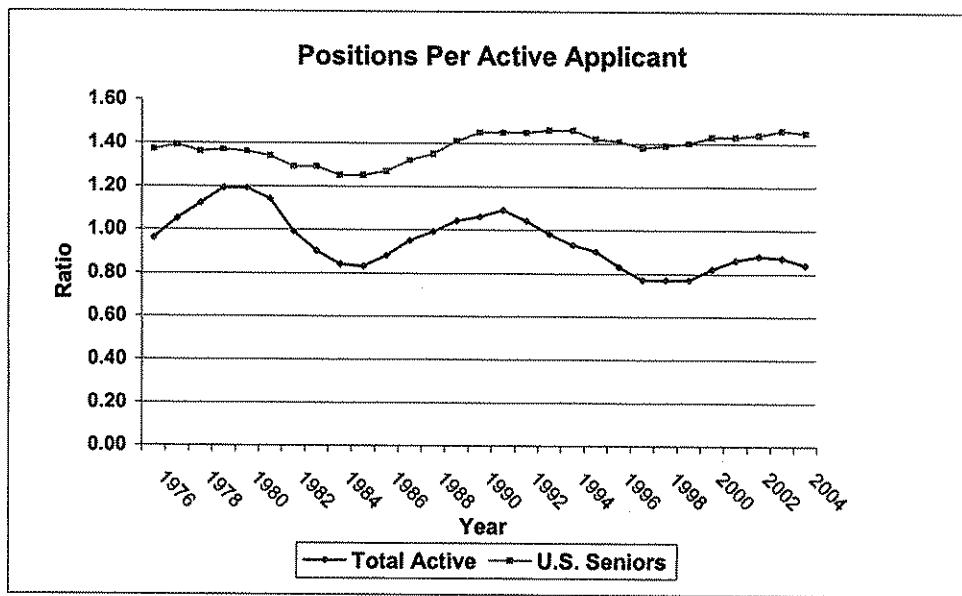

### TABLE 3

The ratios of PGY-1 positions to active applicants from 1976 through 2004 are shown in Table 3. Active applicants are defined as those who submitted a rank order list.

- In 2004, the ratio of PGY-1 positions per active U.S. senior remained almost constant with the previous two years at 1.45/1. The ratio declined from 2.0/1 in 1972 (not shown) to a low of 1.25/1 in 1984 and 1985. Since then it has fluctuated between 1.32/1 and 1.46/1.
- The ratio of PGY-1 positions to total applicants (rather than only U.S. seniors) is quite different and declined slightly this year, reflecting the fact that the increase in the number of active applicants was greater than the increase in total positions.

**TABLE 3**  
**Ratio of PGY-1 Positions to Active Applicants**  
**1976 - 2004**

Year	Number of Positions	Active U.S. Seniors	Positions Per U.S. Senior	Active Total	Positions Per Active Applicant

#### TABLE 4

Table 4 displays the match rates to PGY-1 positions for U.S. seniors, U.S. citizens trained in foreign medical schools, non-U.S. citizens trained in foreign medical schools, and others (Canadian, osteopathic, Fifth Pathway, and U.S. physicians). Three of the four categories registered slight decreases in **match rates**, which is the percentage of active participants who matched to PGY-1 positions. Only U.S. IMGs showed an increase.

- 92.9 percent of U.S. seniors matched, down 0.3 percentage points from 2003.
- Canadian, osteopathic, Fifth Pathway, and U.S. physicians collectively matched at 58.7 percent, a decrease of 0.8 percentage points from the 2003 Match.
- The match rate for U.S. citizen graduates of foreign medical schools rose by 0.8 percentage points, the seventh year of an increase.
- Reversing a five-year upward trend, the percentage of non-U.S. citizen graduates of foreign medical schools who matched declined by 3.3 percent.

## TABLES 5 and 6

Table 5 illustrates the numbers of positions offered in the Match by specialty, as well as the numbers filled by U.S. seniors and by an aggregate of all other applicants. Table 6 displays the same information in percentages.

- For the sixth consecutive year more than 20,000 matches were made to PGY-1 and PGY-2 positions, with an increase of 622 over 2003 and 1,956 for the six-year period.
- The **fill rate** for all programs also increased in 2004, and at 92.0 percent is the highest for the six-year period.
- The number of offered PGY-2 positions continued to rise with 55 more positions in the 2004 Match, including 24 more in Dermatology, 12 more in Diagnostic Radiology, and 13 more in Anesthesiology.

Specialties of note are:

- Specialties and specialty tracks with at least 10 positions in the Match and 100 percent fill rates:

Radiation Oncology: PGY-1  
Diagnostic Radiology: PGY-1  
Urology: PGY-1

- Specialties with at least 10 positions in the Match and over 90 percent filled by U.S. Seniors:

Dermatology: PGY-1  
Pediatrics-Psych/Child Psych: PGY-1  
Orthopaedic Surgery: PGY-1  
Plastic Surgery: PGY-1  
Diagnostic Radiology: PGY-1  
Radiation Oncology: PGY-1

- Nine specialties with at least 10 positions in the Match had fill rate variances greater than 5 percent when compared to 2003:

Internal Medicine-Emergency Medicine: declined by 12.9 percentage points  
Internal Medicine-Pediatrics: increased by 5.7 percentage points  
Internal Medicine-Psychiatry: decreased by 8.2 percentage points  
Neurosurgery: decreased by 9.0 percentage points  
Neurology: increased by 5.8 percentage points  
Otolaryngology: decreased 6.3 percentage points  
Preventive Medicine: decreased 9.6 percentage points  
Psychiatry-Family Practice: increased 35.7 percentage points  
Urology: increased 5.4 percentage points

## **TABLES 7, 8, and 9**

Tables 7, 8, and 9 present the data by specialty for PGY-1 programs for three different groups: all applicants, U.S. seniors, and foreign-trained physicians. Foreign-trained physicians are U.S. citizen and non-U.S. citizen graduates of foreign medical schools, excluding Canadian, osteopathic, and Fifth Pathway applicants.

### **Generalist Specialties**

For the first time since the 1997 Match, the generalist specialties matched more U.S. seniors than the prior year. In 2004, 43.7 percent (5,930) of U.S. seniors who were active applicants matched to first-year residency positions in one of the generalist specialties. That number was 21 more applicants, but still a 0.5 percent decrease from 2003. The generalist specialties are defined as:

- Family Practice
- Internal Medicine, Internal Medicine-Pediatrics, Internal Medicine-Primary
- Pediatrics, Pediatrics-Primary

All of those specialties except Family Practice and Internal Medicine-Primary matched more U.S. seniors in 2004 than in 2003.

- 1,185 (8.7 percent) of matched U.S. seniors will enter Family Practice residency programs, a decline of 41 from 2003 and 1,091 fewer than in 1996
- 3,086 (22.7%) of matched U.S. seniors will enter Internal Medicine, Internal Medicine-Pediatrics, or Internal Medicine-Primary residency programs, an increase of 46 from last year.
- 1,659 (12.2%) of matched U.S. seniors will enter Pediatrics or Pediatrics-Primary residency programs, an increase of 23 from last year.

Table 9 shows by specialty the number of U.S. citizen and non-U.S. citizen foreign-trained physicians who matched to PGY-1 positions. By far the largest percentage (40.6%) received positions in Internal Medicine. The next largest group was in Family Practice, where foreign-trained physicians filled 18.0 percent of positions offered, the same percentage as last year.

Source: National Resident Matching Program 2004 Match Data

## TABLE 10

Table 10 is displayed in two parts. Table 10a shows the number of programs ranked by U.S. seniors, and Table 10b reports the same information for all applicants. For example, an applicant ranking ten programs would contribute a count of ten to the total. Very competitive specialties are likely to have higher ratios of numbers of ranks per numbers of positions because applicants tend to rank more programs in those specialties.

The Ranked Positions column describes the total number of times a particular specialty was ranked. Using Anesthesiology PGY-1 for Total Applicants (the right side of the Table 10b) as an example:

- The first two columns show that 74 programs offered 443 anesthesiology PGY-1 positions.
- The Ranked Positions Column shows that collectively all applicants ranked those Anesthesiology programs 4,028 times.
- The next column (No. of Ranks/Position) shows the ratio of the number of ranks to the number of positions was 9.1/1 (4,028/443).
- The next two columns show that 414 of the 431 Anesthesiology PGY-1 positions offered were filled for a fill rate of (93.5 %).
- The last column indicates that 18 Anesthesiology programs had unfilled positions after the Match.

## TABLE 11

Table 11a displays by specialty the program choices made by matched and unmatched U.S. seniors. Table 11b shows the same information for independent applicants. Independent applicants include the following categories:

- U.S. Citizen Graduates Of Foreign Medical Schools**
- Non-U.S. Citizen Graduates Of Foreign Medical Schools**
- Canadian Applicants**
- Osteopathic Applicants**
- Fifth Pathway Applicants**
- Previous U.S. Graduates**

Prior to this year, Table 11 displayed the number of Positions per U.S. Senior and the number of Positions per Active Applicant. Those calculations were based upon the numbers of applicants who ranked the specialty as their Only Choice, First Choice, or Not First Choice. This year, the table was revised to calculate the ratio of Preferred Positions per U.S. Senior and the number of Preferred Positions per Active Applicant. In those calculations, the denominator includes only those applicants for whom the specialty was the only or first choice.

Prior to the 2003 Match, this table counted only PGY-1 positions, including preliminary positions in all specialties. In 2003, PGY-2 positions were added so that the table reflected the total number of positions offered within a specialty. Beginning this year, preliminary and transitional year positions have been eliminated from the calculations. Thus, the numerator now consists of all positions in a specialty, minus preliminary positions. Currently, an applicant who ranked categorical Dermatology programs as well as advanced Dermatology programs is counted once under the "Dermatology Only Choice" column.

The table also shows the ratio of applicants choosing a specialty to the number of positions in that specialty. For example:

- 382 U.S. seniors ranked at least one Dermatology program. Dermatology was the preferred specialty for the 373 U.S. seniors for whom it was the only or first choice. With only 294 positions offered, the ratio of positions to U.S. senior applicants for whom it was the preferred choice was 0.8:1, indicating a competitive specialty.
- On the other hand, 978 U.S. seniors ranked at least one Diagnostic Radiology program, and it was the only or first choice for only 971 of them. With 978 positions offered, the ratio of positions to U.S. senior applicants was 1.0:1, indicating the supply and the demand are almost equal for those positions.

While the ratios for U.S. seniors and the total applicant pool are similar in many specialties, there are some notable exceptions. In some specialties, the ratios for U.S. students were significantly higher than for all applicants combined, meaning all other applicants ranked those specialties much more frequently. For example:

Specialty	U.S. Ratios	Total Applicant Ratio
Family practice	2.4	1.1
Pathology	1.5	0.7
Psychiatry	1.5	0.8

<b>TOTAL</b>	<b>7,646</b>	<b>2,493</b>			<b>23,668</b>	

NOTE: <sup>1</sup>Total Preferred Choices is the number of U.S. seniors and independent applicants for whom that specialty was the first or only choice.

NOTE: <sup>2</sup>Preferred Positions Per Active Applicant is the ratio of Total Positions to the number of U.S. seniors and independent applicants for whom that specialty was the first or only choice.

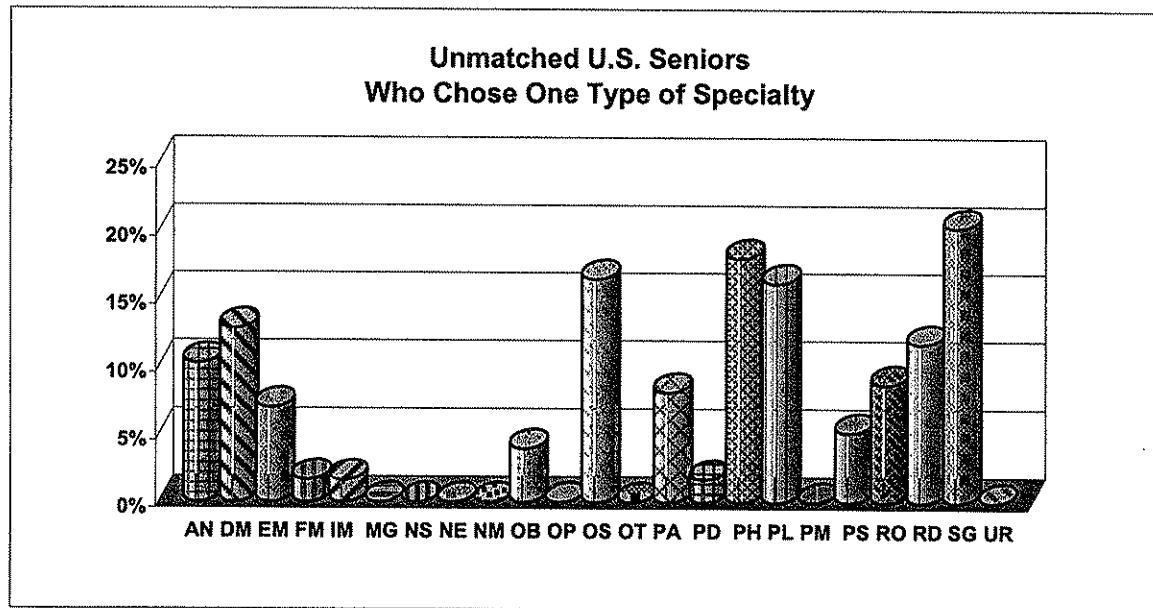

## TABLE 12

Table 12a examines the 87.0 percent of U.S. seniors who submitted rank order lists with only one type of specialty ranked. Table 12b, which displays the same information for independent applicants, is new to the Results and Data Book this year. As in tables 11a and 11b, this year preliminary and transitional year positions were not used in the calculations because they do not represent a "specialty choice".

The high percentage of unmatched applicants in such specialties as Dermatology, Orthopaedic Surgery, and General Surgery reflect the fact that there are significantly more applicants interested in those specialties than there are available positions. That disparity also is reflected in the high fill rates (Table 6) for the PGY-1 positions of the three specialties, which were 96.8 percent, 99.8 percent, and 99.8 percent respectively.

## TABLE 13

This year, the data for 1992-2004 have been re-calculated from the NRMP Data Warehouse so that only programs listed on applicants' primary rank order lists are used. In addition, each partner of a couple was credited with the highest rank on the rank order list of the program to which he/she matched since couples frequently rank the same program multiple times.

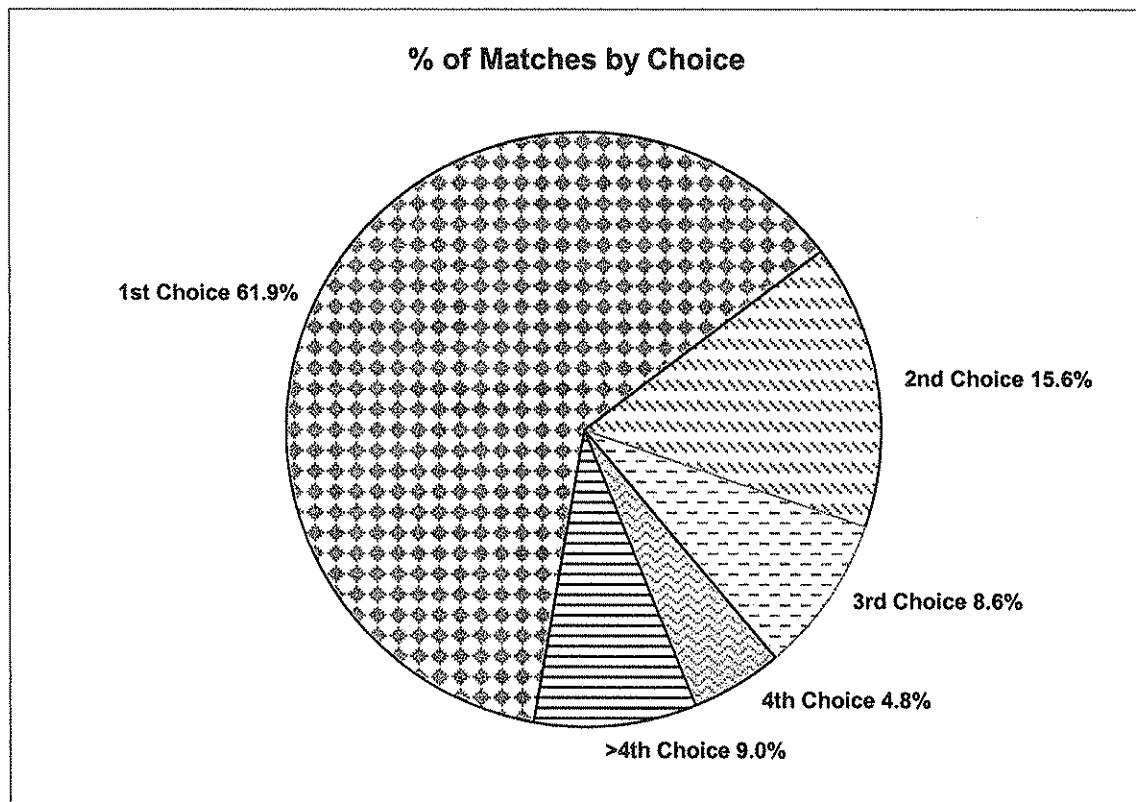

Table 13a displays the number of matches obtained by U.S. seniors to programs that were ranked by the students first, second, third, fourth, or fifth and lower. Table 13b, which displays the same data for independent applicants, is new to the Results and Data Book this year.

Of all matches obtained by U.S. seniors on their primary list, 86.1 percent were to one of the first three choices. The percent of matches to programs ranked among the top three choices is down 0.4 percentage points from 2003. Approximately 61.9 percent were first choice matches, 15.6 percent were second choice, and 8.6 percent were third choice.

The percentage of independent applicants who matched to one of their top three choice programs was almost as high as that for U.S. seniors. More than one-half (52.2%) matched to their first choice program, 19.5 percent matched to their second choice, and 11.8 percent matched to their third choice, for a total of 83.5 percent.

## TABLE 14

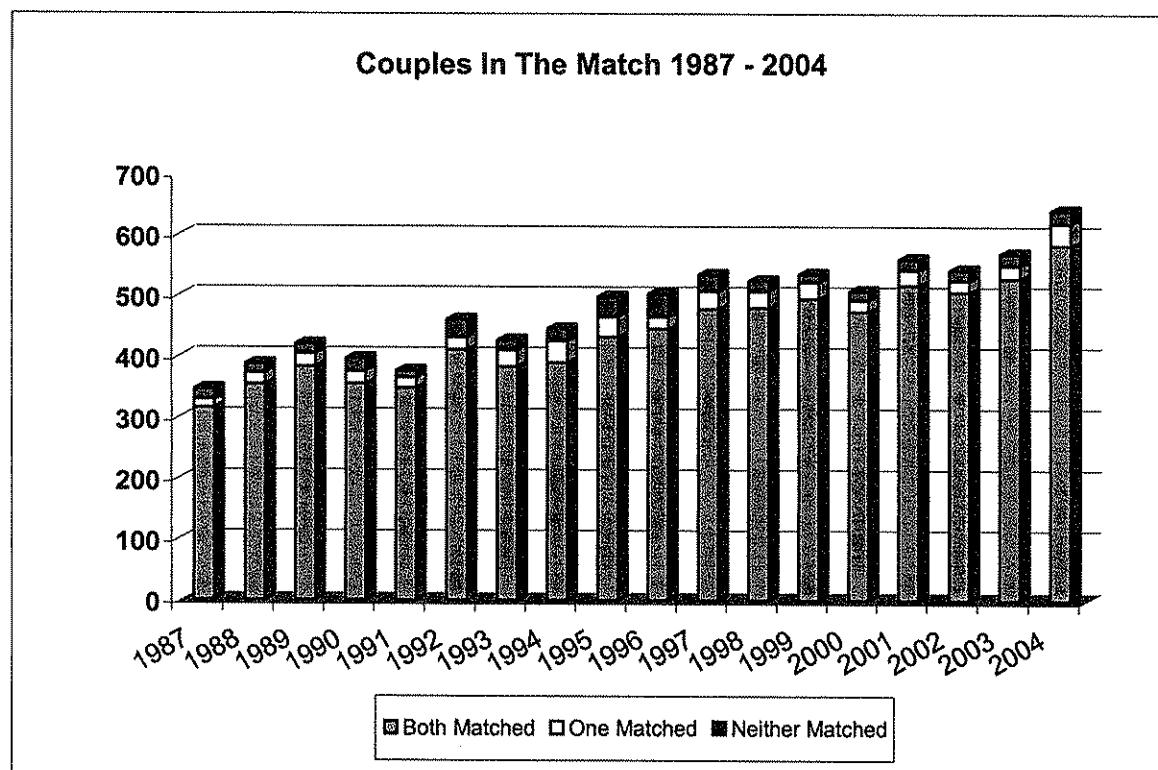

Couples have been able to participate together in the NRMP's Main Residency Match since 1984. The two partners identify themselves as a couple to the NRMP and submit rank order lists of identical length. The algorithm treats the two lists as a unit, matching the couple to the highest linked program choices where both partners match to programs on their lists.

Couples enjoy great success in the Match, with match rates above 90 percent every year since 1984. In 2004, the match rate for couples was 93.9 percent. More than 80 percent of couples are U.S. seniors, and their match rates are very similar to their classmates, varying within 1 or 2 percentage points each year.

Couples have the option of one partner indicating a willingness to go unmatched at a certain rank on the rank order list if the partner matches to the program that is linked to that rank. Table 14 shows the number of couples matched with this option in the *One Matched* column.

## **TABLE 16**

Due to numerous requests, Table 16 was added in 2003 to show the number of PGY-2 matches in each specialty by applicant type.

**TABLE 16**

## **NRMP PROGRAM RESULTS 2004 MATCH**

*NRMP Program Results* lists every hospital that participated in the Match, along with the number of candidates requested and the number matched for each of the institution's programs.

Hospitals are arranged alphabetically within state. The listing includes the hospital name (abbreviated in some instances); the program code, which identifies each program; the quota (the number of positions offered by the program); and the number of applicants matched with that program.

There are three reasons why a program that ranked an adequate number of applicants did not fill its quota: the applicants preferred other programs having vacancies; the applicants did not rank the program; or the applicants had withdrawn from the Match.

There are also three reasons why applicants may not be matched with their most preferred program: the program was filled with applicants it preferred; the program did not rank the applicant; or the program had withdrawn from the Match.

The following types of programs are offered through the NRMP:

- Categorical (C) positions are positions in programs that expect applicants who enter in their first post graduate year to complete the training required for certification in that specialty, provided their performance is satisfactory. Categorical programs in primary medicine and primary pediatrics are designated by (M) to distinguish them from regular medicine and pediatrics programs.
- Preliminary (P) positions are for one or two years of training as prerequisite for entering advanced positions in specialty programs that require one or more years of broad clinical training. Internal medicine, surgery, and transitional programs commonly offer preliminary positions.
- Advanced (A) positions (to begin in 2005) are positions in specialty programs that begin after completion of one or more years of preliminary training. Applicants without prior graduate medical education can apply for those positions while also applying for preliminary positions (to begin in 2004) that are compatible with their plans.
- Physician (R) positions are positions that are reserved for physicians who have had prior graduate medical education. Physician positions are not available to senior U.S. medical students.

### **NRMP Program Code Structure**

The NRMP program code is a **9-character** code based on the following criteria.

- The **first four characters** are the Institution Code.
- The **fifth through the seventh characters** represent specialty code obtained from the **first three digits** of the program's **ACGME Code** and designates the specialty.

- The eighth character represents the program type:
  - ✓ P – Preliminary program
  - ✓ C – Categorical program
  - ✓ M – Primary program
  - ✓ A – Advanced program
  - ✓ R - Physician program
  - ✓ F – Fellowship program
- The ninth character represents the track
  - ✓ 0 – first program/track in the specialty and program type at the institution
  - ✓ 1 – second program/track in the same specialty and program type at the same institution (i.e. 34<sup>th</sup> Street Clinic)
  - ✓ 2 – third program/track in the same specialty and program type at the same institution (i.e. Rural Clinic)

### **Examples**

Institution: 1022 - UC San Francisco-FRESNO

ACGME Number: 140-05-31-033 - internal medicine

Program Type: P - preliminary

First Track: 0

Program Code: 1022140P0

Second Track: 1

Program Code: 1022140P1

Note: See ACGME Specialty Codes on the following page.
